

## **Data Analyst**

### **About Tamara**

Tamara is the leading shopping and payments platform in Saudi Arabia and the GCC region, with a mission to empower people in their daily lives and revolutionize how they shop, pay, and bank. The company was founded by serial entrepreneur Abdulmajeed Alsukhan along with his partners Turki Bin Zarah and Abdulmohsen Al Babbain. Tamara has over 500 employees and operates out of its headquarters in Riyadh, Saudi Arabia; and has offices in the UAE, Egypt, Germany, and Vietnam. Tamara has more than 10 million users and more than 26,000 merchants including leading global and regional brands such as SHEIN, Jarir, Noon, Ikea, H&M, Farfetch alongside local small and medium businesses. The Company is backed by Sanabil Investments, a wholly owned company by the Public Investment Fund (PIF), Checkout.com, Coatue, Shorooq Partners, and Endeavor Catalyst among others.

### **About the role**

We are looking for an early to mid career Data Analyst (min 3 years experience) to take us to the next stage of growth, supporting the finance function. The successful candidate will have experience developing analytical solutions and assisting with data-driven decision making, while managing stakeholders from finance and corporate finance. You will be at the confluence of finance and data, helping to shape financial reporting with a solid understanding of accounting and finance paired with practical experience working on databases, ETL/ELT processes, and building dashboards. Tamara is a high growth startup looking to develop key product success metrics and enhancing decision making through data.

### **A Typical Day**

- Drive business impact through actionable insights and identifying key opportunities for rapid growth
- Build dashboards that provide accurate and actionable insights
- Work with the data engineering team on the data enrichment needs of the product team
- Work with stakeholders across the business to prioritize projects based on impact and drive delivery
- Developing a process to identify, analyse, and interpret trends or patterns in complex data sets, empower informed decision making for stakeholders
- Ensuring governance and being a steward of good analytical practices throughout the process

### **Your Expertise**

- 2+ years of experience in data analytics
- Bachelor's degree in Statistics, Mathematics, Economics, Computer Science or other analytical field. Graduates from other fields with relevant knowledge and experience are welcome to apply.
- Hands on experience using programming (Python, R) to manipulate large data sets for insights
- Demonstrated proficiency in one or more implementations of SQL (e.g. MySQL, PostgreSQL)
- Display understanding of your domain of interest - Whether its Finance, Risk, or Product
- Experience using Machine Learning tools and techniques in R or Python a plus!

- Experience using one or more data visualization tools (e.g. Tableau, PowerBI, Qlik)
- Experience creating data visualizations and dashboards with Apache Superset a bonus
- Experience in a high-growth startup or unicorn a bonus!
